

General Chemistry Lab 104A

TA: Leslie Tiensvold

E-Mail: leslie.a.tiensvold@vanderbilt.edu

Drop in Room hours: Tuesday and Thursday from 9:30-10:30

Lab Safety

- No Shorts, Skirts, or Opened Toe Shoes
- Wear safety goggles (Not Glasses) at all times
- If you come wearing inappropriate attire, you will be sent to change before being allowed to begin the lab.
- If I see you not wearing your safety goggles, I will give you a warning. If a second warning is issued, you will receive points off your lab. A third warning equals a zero on the lab and you will be asked to go home.
- Read the Safety rules on pages viii-xi. You will be responsible for following all of them.
- Dispose of all waste properly and leave the lab cleaner than it was before you got there.

General Rules

- I am here to help. Do not be afraid to ask questions. My office hours are for your benefit.
- Reading the lab ahead of time should answer most questions you will have during the lab, but feel free to ask me questions at any time during the lab.
- Pre-labs and written procedure for the days experiment will be turned in during the first five minutes of class. After that, I will not accept them.
- Do your own work. Lab reports, pre-labs, concept questions are all to be done separately. Lab partners are for the work done in the Lab.
- Read the make-up procedure on pages v-vi. I will follow that procedure.
- Notice that your TA (me) will need to be notified in advance and you must turn in all paperwork that is due on that day. Friday is the only day you can make up a lab.
- Tardiness and general conduct will be observed daily and taken into account throughout the semester.

Last but not least...

Have fun but be safe. Lab is supposed to be the place where lecture begins to make sense, but also where you are supposed to enjoy chemistry and enjoy working with your classmates.
